SUMMARY

I am a Computer Engineering student with basic knowledge of programming and web technologies. I am familiar with HTML, CSS, and JavaScript, and I am continuously learning to improve my skills. I am eager to explore frameworks, databases, and software development practices through projects and internships. As a fresher, I am enthusiastic about applying my knowledge, gaining practical experience, and building a strong career in software development.

PROJECTS

Personal Portfolio Website

A personal website designed to showcase skills, about and contact details.

- Created responsive pages including Home, About, Skills, and Contact using HTML & CSS.
- Implemented vertical skill bars to visually represent proficiency levels (e.g., HTML 30%, CSS 50%, JS 20%).
- Added profile photo and role description on the homepage for personal branding.

Student Report Card System

A Python-based program to generate student report cards.

- Designed a system to input student details and marks for four tests.
- Automatically calculated totals, percentages, and grades (A–D) with custom feedback messages.
- Highlighted pass/fail status for each subject to give clear results.

Recipe Book Finder

A recipe management application using MongoDB.

- Implemented “Add Recipe” functionality with title, ingredients, and preparation steps.
- Enabled recipe search based on ingredients and supported view, update, and delete operations.
- Stored and retrieved data dynamically for better usability.

Personal Notes Manager

A web-based notes management system built with Django.

- Integrated user authentication (sign up, login, logout).
- Allowed users to create, view, update, and delete personal notes.
- Stored timestamps for each note to track creation and modifications.
